

Agrifood

Green proteins

The Netherlands is an agrifood powerhouse, world's number 2 exporter of food products and home to world's number 1 food and agriculture university in Wageningen. The East Netherlands boasts more than 60 companies and research institutions working at the forefront of protein-transition technologies. This is a globally-necessary transition from diets requiring high volumes of animal protein to diets based much more on vegetable protein. This significant concentration of knowledge and experience forms a solid platform for expanding the export of products, concepts and technologies developed with partners in the Netherlands.

East Netherlands: a highly innovative agrifood cluster

"Our new facility in Enschede will not only bring production closer to the consumer, representing an investment in the markets and communities we serve, but is expected to allow us to leverage local supply chains, improving our cost structure and sustainability of operations. We are excited to take this next step in bringing the nutritional and environmental benefits of our plant-based meats to the European consumer."

Ethan Brown
Founder and CEO, Beyond Meat

"Dutch business people are known for being intelligent and working efficiently. They also speak English well, and it's easy to operate across the whole of Europe from the Netherlands. In Raalte, we have all the facilities we need: We can receive people well here, the access roads are good, and our office is located in a beautiful location in the middle of all kinds of companies"

Esther Vissers
Director,
Anderson Advanced Ingredients

M Business climate

Wageningen and the surrounding **Foodvalley** are home to a vibrant, highly educated, international research community dedicated to food, nutrition and agricultural sciences.

- 2nd largest exporter of agricultural products worldwide
- 90% of Dutch are fluent in English and many speak German, French and other languages

Foodvalley – the primary knowledge-intensive agrifood ecosystem in the Netherlands. It offers a platform of resources and opportunities to an (inter)national business network to accelerate innovation and market introduction.

Companies

Anderson Advanced Ingredients, Beyond Meat, Bolt Threads, Friesland Campina, FUMI, KraftHeinz, NIZO, Nestlé, Ojah/Kerry Group, Unilever, Upfield, Vivera, Ynsect, among many others.

Open and innovative

Joint public private research programs with the Universities of Wageningen (Food), Nijmegen (Health) and Twente (Tech) and top-class research institutes develop innovative food applications.

**Most innovative
country in the world**

GII 2017-2020

With a highly educated population, good infrastructure, pleasant housing and living conditions and competitive fiscal climate, the Netherlands attracts many foreign companies – from small and medium enterprises to Fortune 500 corporations.

The Netherlands ranks 4th worldwide, by Forbes' Best Countries for Business 2019.

Business support

The **Protein Cluster** assists suppliers of plant protein ingredients, semifinished products, consumer products and technologies in developing and commercializing their innovative products.

Shared facility finder is an initiative of Foodvalley NL and Wageningen University & Research. More than 50 facilities and 300 pieces of advanced equipment can be found. www.sharedfacilityfinder.com

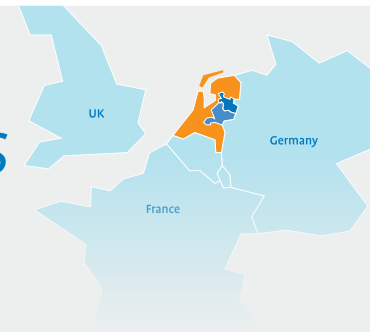

Contract Research powerhouse **NIZO**, a private and independent company, assists companies worldwide with manufacturing of ingredients, with their expertise on food safety, health benefits and smart processing. NIZO builds on over 70 years of experience.

The **Wageningen Food and Biobased Research** institute is world renowned research institute of Wageningen University & Research, offering ample opportunities for companies to collaborate and build upon the expertise of Wageningen.
